

Technical Data Sheet

Attock Gear EP 90 (GL-4)

Attock Gear EP is range of extreme pressure Gear lubricants contain anti-oxidant, anti-Corrosion and anti-foam additives to safeguard against oil oxidation, gear tooth corrosion and reduce the tendency to foam.

APPLICATIONS:

Attock Gear EP offers maximum protection against wear through surface active extreme pressure additives which chemically form a low friction film on the surface of the gear teeth at very high temperatures generated by the meshing of hypoid or heavily loaded helical or spur gears.

BENEFITS:

- Protect against rust and corrosion.
- Exceptional load carrying ability.
- Good oxidation stability.
- Extended transmission life.
- Smooth gearshift.

Typical Physical Characteristics:

PRODUCT	GEAR EP 90	
	ASTM Methods	GEAR EP 90
API		GL 4
SAE		90
Appearance	Visual	Clear
Specific gravity at 60/60 °F	D 1298	0.899
Density at 85 °F	D 1298	0.89
Kinematics viscosity at 100 °C cSt	D 445	17.7
Kinematics viscosity at 40 °C cSt	D 445	202
Viscosity Index	D 2270	95
Flash point °C	D 92	230
Water by crackle test		Negative
